GBCC aims to draw together scientists, researchers, healthcare providers, advocacy groups, and policymakers to increase global awareness of breast cancer, foster a better understanding of the disease and its medical treatments, and enhance the quality of life of breast cancer patients.

Welcome Message

Dear Colleagues,

Welcome to the Global Breast Cancer Conference 2024 (GBCC 2024) in conjunction with International Endoscopic & Robotic Breast Surgery Symposium (IERBS 2024), which will be held from April 25 (Thu) to 27 (Sat), 2024 in Grand Walkerhill Seoul, Korea.

GBCC is one of the biggest breast cancer conferences in Asia and aims to lead Asia and move the world. GBCC is an annual forum where people from all walks of life gather together to come up with multi-scientific strategies in order to effectively diagnose and treat breast cancer and ultimately promote women's health.

GBCC 2023 was held in person as a complete offline conference again after the COVID-19 pandemic. We are excited to announce that we set a new record in terms of attendance by receiving 2,516 breast cancer experts from 38 countries. We firmly believe that GBCC 2023 opened an era that goes beyond curing breast cancer.

GBCC 2024 will be held in conjunction with International Endoscopic & Robotic Breast Surgery Symposium. We hope that GBCC 2024 and IERBS 2024 will be a valuable platform to shape a brighter future for breast cancer patients worldwide. Let us seize this opportunity to engage, network, and foster fruitful discussions that will drive us closer to our shared goal – a world beyond breast cancer.

We thank you for being part of this remarkable journey and for your keen interest in the upcoming GBCC, and we look forward to seeing you in April.

Thank you.

About GBCC

“One of the biggest breast cancer conferences in Asia”

Started in 2007, the Global Breast Cancer Conference is a biennial event hosted by Korean Breast Cancer Society (KBCS). Now, it has become one of the biggest breast cancer conferences in Asia.

Since its successful inception in 2007, GBCC has provided the best learning opportunities and served as a hub for networking for those involved in the area of breast cancer to pick up the latest knowledge from basic research to state-of-the-art therapy and to build a stronger relationship with professionals from all around the world.

As a result, GBCC has been certified as the “Global K-Convention” in recognition of its potential for international growth. K-Convention is a certified brand given by the Korea Tourism Organization to promising conferences held in Korea.

SUBMISSION GUIDELINE

1. Abstract Format

- Abstracts should be submitted online in English.
- The abstract structure should be as follows:
 - An abstract should be structured into the following headings: Background, Methods, Result, and Conclusion.
 - For Trial-in-Progress submissions, please use the following headings instead: Background Trial Design, Statistical Methods, Present Accrual and Target Accrual.
 - Abstracts should be no more than 300 words (excluding abstract title and spaces).
- The maximum number of co-authors is 30 per abstract.
- No figures, tables, references and keywords are accepted.
- If an author is affiliated with a hospital as well as a university, please enter the name of the hospital for which he/she works.

2. Conflicts of Interest

- The conflict of interest policy applies to all abstract authors. Any potential conflict of interest must be indicated upon abstract submission. It is the responsibility of the Presenting Author to obtain disclosure information from all co-authors and to provide disclosure of all interests and relationships. This includes any financial or other relationships with commercial entities whose products or services are related to the subject matter in the manuscript, or sociopolitical issues that may cause a conflict.

3. Encore Abstract Submission

- Encore submissions must:
 - Have been presented solely in abstract form, including publication in conference proceedings. (Submissions which was already published in the full publication form in journals are NOT accepted.)
 - Include significant additional data from the previous presentation (as determined by the review committee).
 - Include the abstract title, co-authors listed, the full abstract, and indicate if this is an encore presentation and, if so, where it was previously presented. This information should be presented both in abstract and in poster.
- It is the sole responsibility of the author to follow these rules.
- The first author will be responsible for obtaining, and, upon request, showing proof that written permission has been obtained from the copyright holder of the original abstract publication(s).
- Please note that encore abstracts may be at a disadvantage for awards and scholarships.

4. Acceptance Notification

- Abstract acceptance will be notified by e-mail.
- The decision of the Scientific Program Committee on abstract acceptance is final. While authors' preferences for oral or poster presentations will be considered, the committee may offer an alternative format. No correspondence on their decision can be initiated by the authors.
- The first author or corresponding author should reply to the notification of acceptance of their abstract for attendance confirmation.

JBC (Journal of Breast Cancer)

<http://ejbc.kr>

Journal of Breast Cancer (JBC) is one of the most influential journals issued by the Korean Breast Cancer Society (KBCS). It aims to provide a forum for the academic communication between medical doctors, basic science researchers, and health care professionals to be interested in breast cancer. To get this aim, we publish original investigations, review articles, brief communications including case reports, editorial opinions on the topics of importance to breast cancer, and welcome new research findings and epidemiological studies, especially when they contain a regional data to grab the international readers' interest. Although the journal is mainly dealing with the issues of breast cancer, rare cases among benign breast diseases or evidence-based scientifically written articles providing useful information for clinical practice can be published as well.
