## “One of the biggest breast cancer conferences in Asia”

Started in 2007, the Global Breast Cancer Conference is a biennial event hosted by Korean Breast Cancer Society (KBCS). Now, it has become one of the biggest breast cancer conferences in Asia.

Since its successful inception in 2007, GBCC has provided the best learning opportunities and served as a hub for networking for those involved in the area of breast cancer to pick up the latest knowledge from basic research to state-of-the-art therapy and to build a stronger relationship with professionals from all around the world.

As a result, GBCC has been certified as the “Global K-Convention” in recognition of its potential for international growth. K-Convention is a certified brand given by the Korea Tourism Organization to promising conferences held in Korea.

## JBC (Journal of Breast Cancer)

<https://www.ejbc.kr/>

Journal of Breast Cancer (JBC) is one of the most influential journals issued by the Korean Breast Cancer Society (KBCS). It aims to provide a forum for the academic communication between medical doctors, basic science researchers, and health care professionals to be interested in breast cancer. To get this aim, we publish original investigations, review articles, brief communications including case reports, editorial opinions on the topics of importance to breast cancer, and welcome new research findings and epidemiological studies, especially when they contain a regional data to grab the international readers' interest. Although the journal is mainly dealing with the issues of breast cancer, rare cases among benign breast diseases or evidence-based scientifically written articles providing useful information for clinical practice can be published as well.
